

- ▶ **Creation of a Calgary WIL Community of Practice**  
Ongoing work with 72 practitioners at seven schools.
- ▶ **Development of a central job posting portal**  
TalentED YYC has created a portal so job postings can go to all 7 Calgary schools at once (instead of employers having to navigate each school's job boards separately).  
This makes it easy for employers to connect with talent across the city.
- ▶ **Mapping of 350+ WIL offerings in Calgary**  
The catalogue helps employers find students with specific skill sets or education across different schools in Calgary. Prior to TalentED YYC work, only 11 were listed nationally.
- ▶ **Creation of a central list of funding options**  
A centralized list of 24 funding delivery partners (like the Alberta WIL Vouchers program) that offer financial incentives for employers to hire a student. This simplifies the process for employers to find relevant funding opportunities.
- ▶ **Collection of 190+ resources for employers and students**  
Prior to TalentED YYC work, there was no central place for all resources related to hiring a WIL student.
- ▶ **A dedicated team of engagement specialists to help guide employers through the process with personalized support**
- ▶ **Generated 5 million advertising impressions about student talent**
